

## CREATOR AND FOUNDER OF DOGGY JAVA MARI JUSTIN

Mari Justin is the Creator and Founder of *Doggy Java*. Mari's deep affection for animals is what drives her today. Her genuine love for animals began at a young age and has now led her into researching what supports the good health of her pets. While caring for her aging pets with health problems and her own struggles with breast cancer, Mari was driven and determined to find solutions to a healthier way of living, not only for herself, but her pets as well.

Wanting to enjoy a longer life with her pets and searching for healthier alternatives prompted Mari to embark on her journey down a long road of endless research and development. She wanted to find the right treats that were safe and tasty and that her pets would love. Since drinking coffee and tea are such a popular tradition, as well as a daily habit for billions of people throughout the world; Mari thought this could also be a great time to share a relaxing and peaceful moment with her four legged furry best friends!

The combination of Veterinarians telling Mari that her pets were dehydrated and her desire to find a treat that would provide nutrition and hydration is what sparked the beginning of the creation of *Doggy Java*, a natural vitamin treat mix made for dogs.

“The love I have for all animals is a driving force in my life, my heart and soul,” says Mari. “This drive has carried me over the seven years it took to create and finalize *Doggy Java*. The delight in the faces of all dogs when they drink it up with such happiness and satisfaction is what *Doggy Java* is all about.”
